25X1A

1. Comment. As this report on freight traffic through Forst is the first received after a prolonged period, comparable data from previous months are not available. The present report indicates that mainly coal shipments are directed through that border station. Coal shipments through Forst amounted to about 313 carloads daily, which is 250 percent more than the amount directed through Guben, the other border crossing point for coal shipments. A daily average of 126 cars loaded with coal was reported from the latter station for February.

25X1A

25X1A

2. Comment. Fuel deliveries by East German hydrogenation plants to Poland and returning empty railroad tank cars.

25X1A

3. Comment. Empty freight cars dispatched to Upper Silesia for the importation of coal. The daily average of 292 such cars indicates that coal shipments will decrease in March.
